This project has received funding from the European
Union's Horizon 2020 research and innovation
programme under grant agreement No 649496

EXCEPT Working Papers are peer-reviewed outputs from the <http://www.except-project.eu/> project. The series is edited by the project coordinator Dr. Marge Unt and by the project co-coordinator Prof. Michael Gebel. These working papers are intended to meet the European Commission's expected impact from the project:

- i. to advance the knowledge base that underpins the formulation and implementation of relevant policies in Europe with the aim of enhancing the employment of young people and improving the social situation of young people who face labour market insecurities, and
- ii. to engage with relevant communities, stakeholders and practitioners in the research with a view to supporting relevant policies in Europe. Contributions to a dialogue about these results can be made through the project website <http://www.except-project.eu/>, or by following us on twitter [@except_eu](https://twitter.com/except_eu).

About the editors:

Marge Unt - <http://www.except-project.eu/our-team/id/53>

Maria Jeliaskova – <http://www.except-project.eu/our-team/id/67>

Responsibility for all conclusions drawn from the data lies entirely with the author.

The Database of Youth Policies and Legislation on Youth Inclusion ("the Database") has been prepared as a part of the activities under the EXCEPT Project (Social Exclusion of Youth in Europe: Cumulative Disadvantages, Coping Strategies, Effective Policies and Transfer).

The Database has four parts:

- Part I: Macro indicators (2000-2016);
- Part II: Quantitative and qualitative information on national policy measures;
- Part III: Description of selected policy measures in EXCEPT partner countries - . Bulgaria, Estonia, Germany, Greece, Italy, Poland, Sweden, the UK, and Ukraine;
- Part IV: Description of selected policy measures in non - EXCEPT countries – that is other EU countries that are not partners in EXCEPT project;

The database contains data on more than 150 economic and social policy statistical indicators for the period from 2000 to 2016. Most of the statistical indicators address the situation both in all EU Member States and EU as a whole. In addition, the database contains summarized qualitative information on general policy trends in the field at national level & quantitative and qualitative information on selected youth inclusion policy measures, provided by national experts.

Information used in the Database comes from various sources such as Eurostat, European Commission (DG EMPL, DG ECFIN), OECD and national reports on youth employment policies. National reports have been prepared by national experts for the respective country. Data source, including description, web links and date of access, is provided for each indicator.

Access the Database here: <http://www.except-project.eu/database/>
